

Berry Bunny Learns About

COVID-19

Written by: Natalie Tjota
Illustrated by: Sara Xu

We all feel scared when there's something going on that we don't understand.

sa

But by learning like Berry Bunny, we can understand what's going on and be less scared!

First, Berry Bunny wanted to learn about coronavirus. Berry Bunny learned....

1. Coronavirus, like all viruses, is so small you can't even see it! That's how you can get it inside you without even knowing.

2. When it gets inside of you, the virus uses your cells' machinery and energy to make copies of itself.

3. Sometimes your body has a hard time figuring out there is a virus inside of it. Vaccines help by preparing your body to recognize the virus. The flu is also caused by a virus, but that virus is a different size and shape.

As the body works hard to get rid of the virus, bunnies can develop a cough, fever, and sore throat. The virus can also attack the lungs and make it hard to breathe.

Berry Bunny didn't feel sick and wondered why it was so important to stay at home.

Berry Bunny learned that although many bunnies can get the virus without feeling sick, some bunnies can get very sick. By staying home, Berry Bunny could help stop the virus from spreading and making other bunnies sick.

Berry Bunny loves being helpful and wanted to learn how else to help other bunnies. One way to help is by staying 6 feet away from other bunnies.

Berry Bunny learned so much and wanted to remind you that you can help too by remembering to....

Wash your hands ...

...before you eat!

... after you sneeze!

... after you go to the toilet!

And try to sneeze into your elbow... so your hands stay clean!

82

Berry Bunny found lots of ways to have fun at home, but as the days passed, Berry Bunny began to wonder how long this would all last.

No bunny knew for sure when Berry Bunny could go back to school, but lots of bunnies were working hard to keep every bunny safe so that Berry Bunny could go back to playing outside as soon as possible! Bunnies like...

Doctors...

nurses...

therapists...

- post office workers
- cleaning crews
- truck drivers
- chefs and cooks
- grocery store workers
- bank tellers
- teachers
- lab technicians
- police officers and firefighters
- ambulance drivers

and so, so many more!

ACTIVITIES!

What is COVID-19?

COVID-19 is a shorter word scientists came up with to talk about the coronavirus. Color in the letters and numbers from COVID-19 in the outline below to see where they came from!

Tic-Tac-Toe

Cut out the coronaviruses and Berry Bunnies to play tic-tac-toe over and over!

Decorate your own mask

Bonus: Find things around your house and make your own mask!

**Draw a picture of someone you
stay home for!**

Other activity ideas

1. Write a song that you can sing while washing your hands. Make sure it's at least 20 seconds long!
2. See how hand washing can protect you from germs like coronavirus.
 - a. In one bowl pour some water and pepper
 - b. Dip a finger in some soap and then see what happens when you put your finger in the water/pepper mixture.
